Essentium Copolyester PCTG

Description

Essentium Copolyester PCTG is a member of the copolyester family, chemically similar to PETG. Our PCTG is an easy-to-use material with incredible surface finish and excellent impact resistance. This robust material can be printed in open air, and over a large temperature range. Depending on the temperature you choose, you can give your prints either a glossy or matte finish. Compared to PETG, our PCTG has similar strength and stiffness, while offering superior impact strength and chemical resistance.
